Town Council Meeting Held on Monday Evening

Several Buildings in Town Have Prices Set

The Town Council met in regular session last Monday evening and the Mayor and all councillors were present.

Mr. Rindahl was the meeting and requested that the council each give a tree to the park. Council approved of this plan.

Two men from Medicine Hat made a request for a building in town in which they proposed to raise rabbits. Council was not agreeable.

The School Board requested for \$1,150 for school affairs. The request was granted.

The Town Band committee made a request for an amount of \$50.00 to improve the local band. The request was not granted at present.

Mr. Kallestad and Mr. McGillicuddy applied to buy houses in town, and both agreements were approved by council.

Mr. H. Duce applied for purchase of building in east end of town. A price was set and council agreed to the sale.

Price arrangements were made for renting of store buildings in town.

A price was set on building near Old Rolling Mill and sold to Mr. H. Bortis.

Council set price of building on Seventh St. West at \$100.

The finance committee submitted reports for payment and were approved by council.

Council agreed to membership in the Union of Alberta Municipalities for the current year.

REPORT OF WEEK IN EDMONTON

Affairs of state have progressed with a rush during the week just past. After putting the final O. K. on the estimates, the Legislature Assembly settled down to the remaining business with a determination that spells an early end to the present session.

Perhaps the greatest impetus in this respect will be due to the time limit which the members imposed upon themselves by endorsing a Roy Taylor resolution which makes 40 minutes the limit beyond which no order may arise.

There are exceptions, of course.

Eastertide at The Gondon Memorial

Special Services Will Be Held During Holy Week

All members of Gondon Memorial are urged to attend the Quarterly Communion service to be held on Sunday morning at 11:15 A. M. This is our Monthly Morning Service and the Junior Choir will assist in the music. During Holy Week, April 3 to 7, there will be an Evening Service every evening commencing at 8 P. M. The following guests, ministers from Medicine Hat will be in charge of these guests. Fellowship Services:

Monday: Rev. Hollingsworth St. John.

Tuesday: Rev. Bainbridge Fifth Avenue.

Wednesday: Rev. Claxton.

Thursday: Major Redner Salvation Army.

Good Friday: At 11:00 A. M. there will be morning service when Rev. Jesse of First Baptist will be the guest minister. At 8 P. M. the Young People's Union will be in charge of the service.

Every member, adherent and friend of Gondon Memorial is given a cordial invitation to attend these services.

Watch next week's paper for Special Easter Services.

Report Says Wheat Price Must Stay

This is a Report of the People's Weekly Opinion

Western farmers and all wheat-growers should keep up the pressure against Ottawa on the wheat price question. As individuals and through organizations with which they are connected, they should bombard the government and their own members with protests against the cutting of the Wheat Board and the diminution of the minimum price.

The question is one vitally affecting not only the farmers but every other person in Western Canada. If the minimum price has "cost" the government \$48,000,000 as Hon. J. G. Gardiner claims, then the removal of the minimum will mean that much less the western farmer will have to spend.

The low world price of wheat is a national calamity. It is not only justice but good national economy to spread the burden of it over the whole country, rather than have it fall on the backs of one section of the population.

The united voice of the west is heard in protest against the removal of the minimum price.

In Greenville Miss., wild ducks were killed out of the sky by fall stones and fell in the street.

Travelling clinics, which operate during the summer months in various parts of the province, will concentrate on the dry areas this year. Health Minister Dr. W. W. Carson told the House. That the legislature endorses the system of taking medical attention to the people was shown by the vote of \$16,255 grant for this purpose; an increase of \$5,000 approximately over the previous figure.

Interesting Gathering Last Monday Evening

Had Games Dancing and Music At St. Ambrose Hall.

Last Monday evening an enjoyable gathering of Ladies and gentlemen was held in St. Ambrose Parish Hall. There was an interesting game of cards, the winners of which were Mrs. B. Shaw, and Mr. Sid Peterson.

A "hidden contest" which was taken part in by all present and interesting. The winners were Mrs. E. Podesta and D. Johnson.

After the games there was a dance and later nice refreshments were served.

During the evening Mrs. W. Pearson gave a number of interesting piano selections and all thoroughly enjoyed them.

Alberta Govt. Reports On Horse Disease

Essential that Farmers Acquire All the Information

The Alberta government has reported that should the disease occur in Alberta this year and follow the course that it has taken elsewhere, we may expect it to be of a more virulent form and more widespread than it was during the past season when it occurred in more or less restricted areas. For these reasons, it is essential that farmers and horse-men acquire all the information.

Information regarding the preventive measures that may be taken. Vaccination has been found the most effective method of control. Experiments conducted in a preventive, not a cure, and vaccination to be effective must be done BEFORE the disease is contracted.

TENDERS FOR ROADWORK

Tenders will be received by the undersigned up to 5 p.m. April 10th 1939 for the following roadwork:

Existing road site to be raised one foot high with loose earth, 1/4 mile of 18 feet at the crown. Sides sloped 1:1.

LOCATION OF WORK

East on 4th Ave. S. E. from 6th St. E. to 7th St. S. E.

South on 7th St. S. E. from 4th Ave. S. E. to 7th Ave. S. E.

East on 7th Ave. S. E. from 7th St. S. E. to Mitchell St. S. E.

This will be approximately 2500 ft. of roadway.

For further details and specifications consult Public Works Committee.

Mr. H. Strange Reports of Many Wheat Varieties

Says Farmers Growing a Number Of Wheat Varieties.

There has never been, I suppose, in the whole history of Western agriculture, a time when there were so many wheat varieties available to the farmer.

This very abundance of good crops may, however, bring difficulties for many farmers, are experimenting by growing a number of these varieties. Such experimenting, I suggest, from my own practical experience, must be done with the greatest of care, otherwise farmers may find their crops becoming badly mixed.

Most wheat varieties tend naturally to cross with each other; whenever this occurs a veritable stream of hybrids are thrown off, many of them poor in yield and poor in quality. Year after year these undesirable new strains increase, resulting eventually in severe injury losses to the farmer.

Different varieties of wheat grown on one farm, therefore, should be kept separate from each other by a wide runway, either of clean land, or by a drill row of oats, and even then the greatest of care must be taken in sowing, harvesting and threshing so that the different varieties do not become mixed with each other.

I suggest, for a farmer, grow only one variety on a large scale, and then let the institutions do the experimental work.

Agriculture Minister McMillan, week introduced a bill which provides for the establishment of publicly owned stockyards in Alberta. The bill was being introduced because "government recognizes the need for public ownership" of such utilities.

NOTICE

All Town Organizations

A meeting will be held in the Town Hall on Wednesday evening April 26th 1939 at 8 P. M. of representatives from town organizations regarding the visit of the King and Queen on May 26th.

Bingvill Dramatic To Produce a Play

Will Be Held on April 1st in Bray Lake Hall

The young people of Bingvill, have organized a Dramatic Club, and are now prepared to produce a very interesting play entitled "Back Stage." Considerable time and work have been put on this play and it will undoubtedly be a success.

Be sure not to miss this entertainment to be held in the Bray Lake Hall on Saturday, April 1st at 7:30 P. M. Tickets 10c.

A dance will also take place following the Dramatics.

Brick Yards in Town Are Now Open

All Regular Employees are Back At Work Now

The Gundersen Brick and Coal and the Press Brick Yards were opened for business during the past two weeks. We understand that the Premier Brick yard will also be open for business soon.

The Redcliff yards have been running fairly steadily the past year and were only stopped a few months for repairs.

The Redcliff Brick Companies are noted for their excellent brick, both in the east and west.

Change Date of The Swimming Pool Carnival

Will Be Held in Broadway Store On May 19 and 20

The town swimming pool committee which had arranged to hold a carnival in the Broadway Building on April 21st and 22nd had decided now that the carnival will not be held until May 19th and 20th.

No doubt there will be much nicer weather by that time and everyone will be able to present.

We understand that at the carnival in May a number of new games will be introduced, and it will be one of the best we have had in town so far.

As there are several necessary improvements to be made in the new swimming pool and also in the park this year we hope that every one in town will be interested in the carnival.

New Arrangement For Tilly Area

Government Has Been Acquiring Titles Steadily

For many years, before the completion of the C. A. Magrath report in 1922 on the Tilly Area, the drought areas of the south eastern part of the province have presented a difficult problem. Continued efforts have been made over this period of years to deal with it. Since the passage of the Tilly Area Act in 1927, the government has been acquiring steadily titles to portions of the land and now holds titles to most of the properties in the Tilly Area, Berry Creek and Sounding Creek districts, each of which is definitely designated geographically.

A gentle rain fell here last night between 11 and 12 o'clock.

Conservation And Unemployment

Since the advent of the great depression and drought era, now nearing its tenth birthday, citizens of the west have become more conscious of the value of trees and of their importance, value and place in the economic life of the country.

During this decade of trial and tribulation, residents of the prairies have observed that while tree areas have not escaped the ravages of drought, the effects of drought have been somewhat ameliorated in areas plentifully supplied with trees. This is mainly due to the moisture conservation power of trees in their relation to contiguous land, partly due to their ability to prevent or halt erosion and to some extent attributable to the fact that such sustenance by very nature lend themselves more readily to agricultural diversification.

As a result of these observations prairie residents have become more tree conscious than they were in the days prior to 1929 and this aroused interest is reflected in the increased attendance at lectures delivered during the annual migrations of the Dominion government's forestry and tree planting railway cars and in the keen interest which has developed in the work being done under the Prairie Farm Rehabilitation Act and by other organizations devoted to conservation work in various forms.

The public consciousness having thus been aroused to the importance, and the necessity of conservation of moisture, it would appear that the time has arrived when very general support would be given to any worthwhile projects which the governments of the country, both federal and provincial, might be prepared to undertake, with the dual objective of conservation of moisture through afforestation and reforestation and at least a partial solution of the unemployment problem. To the extent to which these two problems could be dealt with under a common project would hearty support be forthcoming for such a scheme or series of undertakings.

In The Right Direction

Just recently it was announced by the P.F.R.A. administration that all its newly created community pastures in Saskatchewan, totalling approximately 600,000 acres are to be created game preserves and that custodians of these areas are to be given special training in game conservation as part of a program in which the provincial government, the P.F.R.A. administration and Ducks Unlimited will co-operate.

The idea seems to be an excellent one, but it might well be further extended to include a substantial program of tree planting in those community pastures where conditions lend themselves to such a project, thus widening the moisture conservation episode of influence to adjoining farm lands and providing work as a substitute for direct relief for many now on the relief rolls.

Such work, however, need not and should not be confined to areas now set aside primarily as community pastures and game preserves. It could and should be extended to Dominion and provincial parks and wasteland areas some of which might appropriately be developed as playgrounds and tourist resorts affording a great deal of useful and valuable work for many now idle and creating assets which would ultimately ensure more return to the country for the money thus expended. Coupled with the planting of treeless areas could well be the improvement of districts of existing natural growth.

Of Wide Value

Apart altogether from its value to agriculture in the field of moisture conservation an active and well thought forestry program as exemplified by new plantings and improvement, preservation and care of existing plantations and of natural growth, would have an intrinsic value of great importance in the industrial and economic life of the country.

This was particularly pointed out in the brief submitted last year to the Rowell Commission on Dominion-provincial relations by the Foundation of Ontario Naturalists in support of their contention that the Federal government should take over provincial natural resources or alternatively should aid the provinces in developing and conserving them, in the following words:

"The general prosperity of the Canadian people and Canadian business, no matter in what province, both as sources of taxation and conversely as possible recipients of relief, is of vital concern to the Federal government, is axiomatic."

"How important, therefore, that the Federal government should be concerned that raw materials be available for the construction and building industries, for package, house, barrels, etc., of all kinds for shipping Canadian produce to home and foreign markets, to railways, telephone and telegraph companies for ties, poles and posts and rolling stock, to mines for props and other construction work, to factories for the manufacture of furniture, radio, tools, implements and the hundreds of other things too numerous to mention, for fuel and the many uses on the farm."

And again the same organization pointed out that: "There is the possibility of employing relief recipients on forest improvement work, such as the building of roads, trails, fire lines, brush disposal, improving and creating tourist camp sites and picnic grounds, etc. There still remains a tremendous amount of such work to be done."

Then why not use some of the millions being spent on relief to do some of the work and give work to those who have none?

An Old Chinese Story

Tells How Peach Blossom Became Watermark Paper.

Thirteen hundred years ago, during the Tang Dynasty, a tiny Manchurian slinging girl called Peach Blossom became love had passed her by. Behind her, according to the old Chinese story, she left a trail of beautiful poems, written on airy slips of peach blossom paper and addressed to her most admiring who had been attracted by her famed beauty.

The girl, Hsueh Tan, did not write poems of love, but only of encouragement, urging her admirers to seek greater knowledge or wiser methods of administration. She marked all her poems with a drop of water which spread into the form of peach blossom. This peach blossom watermark is still carried on one of Shanghai's most popular brands of writing paper—the Hsueh Tan—which is noted for its delicate texture.

Recently, during a visit to the girl's shrine at Wang Chiang Lou, where she drew the water for making flowers on the peach blossom paper, some Chinese girls conceived the idea of writing to their husbands and sweethearts at the end of each blossom paper. Hundreds of the scented and water-marked messages were dispatched from Chengtu, each of which was written a verse of encouragement.

For Air Reserve

Flying Schools Offer Their Facilities To The Dominion Government

Representatives of 11 flying schools operated on a commercial basis offered their facilities to the Dominion government to aid in setting up a reserve of air pilots for Canada.

In an interview with Col. V. I. Smart, deputy minister of transport, and Major Gen. L. B. LaFleche, deputy minister of national defence, the flying schools delegation pointed out that many young men designed to earn by fly but were unable to afford it. They suggested the Dominion government make some financial aid for aspiring pilots. Consideration was promised for the flying school suggestion of a student pilot subsidy for 10 hours dual instruction and the first 20 hours solo flying.

In 1933 the flying schools turned out 128 private pilots qualified for government flying. 20 commercial pilots licensed to fly aircraft for hire, and six air engineers or aircraft engine maintainers. The 11 clubs had nearly 800 students enrolled, and the 31 aircraft in use were in the air 3,515 hours of dual control flight instruction and 3,448 hours of solo flying.

Missed His Boat

But Famous Tenor Had His Joke With Stage Manager

Scholastic, New York, tells this story of Leo Slezak, famous tenor, who sang Wagnerian roles at the Metropolitan several years ago.

One night Slezak was scheduled to sing the part of Lohengrin in Wagner's opera of that name. Lohengrin's first entrance is in a boat drawn by a swan, and Slezak was standing backstage ready for the correct cue to hop into the boat. Unfortunately, the stage hand in the wings opposite pulled too early and the swan floated out on the stage without Lohengrin.

Quick as a wink, Slezak turned to the stage manager standing beside him and said, "Hey, conductor, where's the next scene?"

The world's longest automobile highway extends from the Garpe Peninsula, Canada, across the United States, and down to Mexico City.

Guests Were Surprised

When Host Introduced Special Light—log As An Experiment

The dinner guests of Samuel G. Hibben, chatting merrily, walked in to a Chicago hotel dining room one evening and took their places at the table. As they did so a subtle change occurred in the lighting system, and within a few minutes some guests were violently ill, others were mildly sick and all were entirely without appetite for the fine food before them.

The reason for this was that the colors on the table had turned a gaudy pink, the steaks a whitish grey, the tall glasses of milk were blood-red, and the salads were a sickly blue. What had been fresh green peas one moment had become black overcast caviare the next, and side dishes of peasants weirdly became crimson.

Instead of the usual electric lights at the Chicago dinner, Mr. Hibben had managed to have the room illuminated by specially designed filter-lamps which cut out all the ordinary color of the spectrum except green and red. Mr. Hibben, an American engineer, knew that his guests would thus have their stomachs turned—and his experiment was a success. He told them, after normal lighting had been restored, that it was a demonstration of the fact that light and color, not only on the sense of sight, but upon the related senses of taste, touch and smell. Color he reminded his guests, could did express or excite and stimulate a human being no less acutely than it affected the life and growth of a plant.—American Weekly.

Tallest Man In World—

Has Now Become Tallest Man And Weighs 491 Pounds

Robert Wadlow, Alton, Ill., the world's tallest boy, became the world's tallest man on February 22, when Robert celebrated his 21st birthday anniversary. He took stock of himself and found that in the last year he has had: Added one and one-half inches to his height (he now stands eight feet, eight and one-half inches), added 26 pounds (he now weighs 491 pounds).

A celestial year lasts for approximately 200,000,000 of our own year. The Milky Way galaxy, of which we are a part, makes one rotation cycle in that time.

ACTS FAST TO BRING RELIEF FROM COLDS

This Simple Way Eases Pain and Discomfort and Sore Throat Accompanying Colds with Amazing Speed

3. To ease pain and discomfort and reduce fever (also 4. To relieve sore throat and inflammation of the throat) Aspirin Tablets—most effective way yet discovered.

2. To relieve a cold and clear the sinuses Aspirin Tablets—most effective way yet discovered.

Just Be Sure You Use "Aspirin"—Do It the Moment You Feel a Cold Coming on

The simple way pictured above often brings amazingly fast relief from discomfort and sore throat accompanying colds.

Try It. Then—see your doctor. He probably will tell you to continue with "Aspirin" because it acts so fast to relieve discomforts of a cold. And to reduce fever.

This simple way, backed by scientific authority, has rapidly supplanted the use of strong medicines in easing cold symptoms. Perhaps the easiest, most effective way yet discovered.

Tibet Is Strange Land

Author Thinks White Nations Will Break Down Exclusive Walls

No longer is the time-honored wedding ceremony of killing the bride's mother practiced in forbidden Tibet, declared Gordon B. Ender, author and explorer, formerly of the Indian Frontier of Tibet, addressing the Women's Canadian Club in London, last night.

Mr. Ender's position in the strange land of Tibet depended largely on his attitude towards the polygamists. On the plateau the men practiced polygamy, marrying as many wives as they could afford to support and using them to tend their flocks. In agricultural areas the order was reversed. Women practiced polygamy, marrying as many husbands as they were male members in one family.

The Grand Lama, Mr. Ender continued, had ambitions for his country before he was poisoned, apparently by the young Tibetan political party. He had visions of a modern country, with a high degree of education financed by the gold nuggets which lay about and can easily be mined.

Thibetans believe gold grows like the flowers of the grass, and the nuggets they gathered by washing were known as the golden grass. The nuggets the gold. Feeling the plant was destroyed if the root or nugget was taken away, the Thibetans have been when they are found, said the speaker.

Mr. Ender came originally from the China, but at the age of four was taken to North India with his missionary parents and mingling with European leaders.

He has lived in the Himalayas and with little native children, developed an insatiable curiosity about the customs of the people of the Tibetan expedition are going to fall. The day is coming when white nations and I hope it will be Africa or America and no one else will go in to follow the place of the Grand Lama and bring this country into the world, said the speaker.

Undertake Hopeless Task

Two English Clergymen Trying To Free Superstitions Are Founding Church of Christ

Two British clergymen have taken the bit into their teeth in an attempt to destroy such superstitions as are still with the Thibetans, and split said. The two—Rev. R. D. Balleine, formerly of Bermuda, London, and Rev. Dr. E. L. Gough, of Christ Church, Oxford—fired a broadside against superstitions in pamphlets published by the Church of England Assembly.

Mr. Balleine has his hair cut on Fridays. He knows he won't be kept waiting, because most customers think it's an unlucky day to be shorn.

He subscribes to Dr. Gough's cure, which the latter outlines as follows: "The cure is deliberately to stamp out every superstitious feeling at its source. We should walk under every ladder that we meet; we should play at dice on 13 at the table; we should make no difference between one day and another except by the practice of a real religious faith we fall back on rage and tatters of mostly, moon-grown superstitions."

Mr. Balleine, however, does not believe in the idea on which these superstitions are based, yet they go on irrationally observing them.

"The fact is," he says, "we never outgrow our sense of the supernatural. If we cannot satisfy it by the practice of a real religious faith we fall back on rage and tatters of mostly, moon-grown superstitions."

What He Deserved

A doctor was called in to see a very tiny antelope. "Well, sir, what's the matter?" he asked, cheerfully.

"That, sir," growled the patient, glaring, "is for you to find out."

"I see," said the doctor, thoughtfully. "Well, if you'll excuse me for an hour or so I'll go and see a friend of mine, a vet. He's the only chap I know who can make a diagnosis without asking questions."

Quite Polite

Hostess: "I hope my husband wasn't rude when he asked you to play."

Foreign guest: "Oh, no, he just asked me not to play a certain tune."

Hostess: "What did he say?"

Guest: "He said, 'Don't Play For the Love of Mike.'"

Alcatraz Prison is named after the albatross, a bird that has the liberty of land, air and sea; the word albatross comes from the old Spanish word, alcatraz.

California dairies produce more wealth than gold mines.

Has Sewed For Royalty

Toronto Woman's First Work Was Done For Queen Victoria

Perhaps some visitors have noticed a little woman in black sitting here and there through the costume show of the Royal Ontario Museum in Toronto. This is Mrs. E. W. Stephenson, now 75, who is dressing Queen Mary, when the King comes to town.

Mrs. Stephenson sewed for Queen Mary and Queen Victoria. When she was only 15 years old she was apprenticed to Rev. R. B. Rooster, and the very first work she was given to do was the quilting of Queen Victoria's brocade petticoats. That was 38 years ago, but the old Queen and Queen Mary, still the young Queen to Mrs. Stephenson, remain in her memory as vivid personalities.

For more than a quarter of a century she was closely associated with the Royal Family, was entrusted with the Palace to cut gowns for Queen Mary, and remembers all the Royal children. Since she came to Canada in 1911, she said, she had received several letters from Queen Mary, the last just after the death of King George V.

In 1920, Mrs. Stephenson was in the newspapers that the Royal Ontario Museum had received two of Queen Mary's Coronation dresses. She offered her services to the museum to get them ready for exhibition. She herself had helped make the dresses, she said, and was engaged, and padded the forms in which the dresses were fitted to exactly the figure of Queen Mary.

At that time she has been associated with the museum in the restoration of costumes. She embroidered the gown in which Queen Mary was crowned. It was done in two shades of gold on cream-colored satin, she said, and the embroidery designs were symbolic of the dominions of the Commonwealth.

Though she did not admit fervently, it was obvious Princess Mary was her favorite. Queen Mary's children. It was just after Princess Mary to drop from sight when the Prince of Wales assumed the royal duties, she said, the Princess Mary had always disliked having her picture taken.

New Instrument Aids Singers

Stroboscope Installed At Metropolitan Opera, Indicates Pitch

A machine that works at prime donna of the Metropolitan Opera Company is making life easier to sing for the orchestra.

The winker, capable of 32 to 4,070 blinks a second, is a musical pitch meter, each of whose winks represents a single beat of a musical note.

On the fact that in each pure musical note there is a slight natural, a few vibrations, by which the tone can be kept from standard and still be beautiful. In fact the variable may occasionally be more beautiful.

The orchestra must comply with the singer in high-pitched feminine voices. Thus, when the singer is voicing the note of C, represented by 1,297 vibrations a second, she may go as high as 1,425. The orchestra must follow her lead.

The reason is that to the prima donna's ear the orchestra is off key, while to the players the singer sounds off.

With the new winker, which has been installed in the orchestra pit at the Metropolitan, the singer can see, by the winks, the exact number of vibrations of her voice. The orchestra can see its own tone and thus that harmonies best can be practiced.

The winker counts the number of vibrations per second of a musical note, as this makes the pitch note. The machine's brain is an electric lamp known as a gaso discharge tube, whose lighting current automatically pulsates any tone, either of voice or instrument. Each pulsation of the music causes one flash of the lamp.

Contributions Almost Tripled

"March Of Dimes" In Infants Paralyzed Drive Exceeded \$250,000

The White House at Washington announced that contributions sent to the executive mansion in the annual infantile paralysis drive totaled more than \$250,000.

The contributions were sent in a "March-of-Dimes" arranged in connection with the President's Birthday Ball celebrations to raise funds for the National Foundation for the Prevention of Infantile Paralysis.

FIRST ORIGINAL PHOTO OF LATE POPE AFTER DEATH

One of the first original photographs to reach this continent of the late Pope Pius XI, lying in the papal boudoir where he died, is shown above. A rosary may be seen clasped in the late pontiff's hands.

Not Schoolboys This Time

Ontario Musical Director Goes Reverses Fled By Normal Students

Pun has been poked at schoolboys for their "howlers". Those made by prospective teachers are just as humorous.

Some of the answers provided by Normal School students in recent examinations, according to Mr. Fenwick, read: "Children should sing as high as possible without any harm."

"Have them sing as high as possible until they can sing in tune."

"When children have forgotten the tune, ask them to hum it."

"The season of the year will be determined by the song chosen."

"Monotones should have their eyes and ears examined."

"The children who cannot sing should be taken apart."

"If a child has a defective vocal organ take him to the doctor and have it cut."

"The range of the child voice is about 50 feet."

Defending The Nation

Says Duty Of Ex-Service Men Is To Maintain Democracy

The duty of Canadian ex-service men is to contribute their support and encouragement to maintaining the democratic system, which secures their liberties, Hon. R. J. Manion, leader of the Conservative party, told the local veterans of the Princess Patricia's Canadian Light Infantry at Ottawa.

Mr. Manion warned against the encroachment which dictatorship had made upon countries that had been democracies or which had been rapidly developing democratic systems of government.

There were those who did not think Canada was in any danger, but his own belief was that the duty of Canadians was to arm for the purpose of defending the nation.

"Miss Anna, which would you rather be, beautiful or rich?"

"I should like to be rich as well."

The All-American canal in Southern California is the largest irrigation ditch in the United States.

Invisible Glass

New Discovery Comes From Transmitt 99 Per Cent. Of Light

Refractive and quartz, heated until they become vapors, cost ordinary glass so that it becomes almost completely transparent and "invisible."

The method glass and rock made the strongest coating yet discovered and was announced as forecasting films which will be "even more rugged than the glass itself."

"Invisible glass," a discovery announced two months ago simultaneously by the General Electric Company and by the Massachusetts Institute of Technology, is the most spectacular advance in use of glass in scientific history.

The coated glass transmits more than 99 per cent. of light, against 92 per cent. for the best untreated glass. No light can be seen to reflect from this coated glass. Thousands of copier material uses are in prospect as well as a permanent film is assured.

The announcement, made by G. H. Hewley Cartwright and A. Francis Turner of the M.I.T. to the American Physical Society, appears to solve the making of a film that will stick.

In the original discovery these two men used evaporation to coat their glass, while General Electric used a dipping method.

Hard On Shoe Leather

Touring The World On Foot To Win A Wage

"It's hard on shoe leather but it's a great life," said Captain M. E. Butler, who passed through Johannesburg on his way to Cape Town, where he will board a ship on the next stage of his round-the-world hike.

In five months, Captain Butler hopes to reach Canada and collect a 20-year-old debt made during the war.

He was wagged \$2,300 by a Canadian officer that he dared not tour the world on foot. It was stipulated that he must come at least 30,000 miles and accept no lifts.

Captain Butler has worn more than half the hat and worn out the pair of shoes.

Spades are the worst suit of cards in the deck as used in fortune telling. They denote treachery, disappointment, ill luck, and even death.

Robbed Trapper's Cabin

Unsettled Law Of The North Holds Send A Man To Jail

A man who entered and robbed a trapper's cabin on the Bear Lake road, near Barkerville, has been sentenced to 18 months in jail. He violated two laws, the normal law designed to protect private property, and the great, unwritten law of the wilderness designed to safeguard human life.

It is the custom in the British Columbia hinterland, as in all the wild regions of the North and West, for the owners of cabins to leave them unlocked. There is always the possibility that someone, lost and with out food, or ill or hurt in desperate need of shelter, may reach the cabin when the owner is away, and the privilege of entering and making a fire and getting something to eat may mean the saving of life.

No man of the law country begrudges the distressed traveller the wood or food necessary to relieve his distress. But an obligation rests on the man who accepts such hospitality as this. He must not rob of use an undue portion of the supplies, and if it is at all possible, he must replace what he has taken and leave food for the next fire.

There is always the possibility that someone else—perhaps the owner himself—may reach the cabin in as much need as the traveller who has found shelter and gone—Vancouver Province.

The Essential Fact

Government Defeated By Mandate Picked Mackenzie Delagade

The Toronto Financial Post observed a couple of weeks ago that "the man, who defeats good government is the man who doesn't vote."

A reader from the Pacific coast submits this amendment: "Good government is defeated by the man who stays home from the nominating conventions." And even that amendment gets down to the essential fact. Good government is defeated by the man who goes to the nominating convention, as a headpotted machine delegate—Halifax Herald.

Sea feathers, found in offshore waters from the Gulf of St. Lawrence to the Carolinas, actually are animals.

Influence Is Felt

Canadian Public Life Owns Much To Women's Initiative

This is a least in the ladies. Those ladies, members of the various church and community organizations, Women's Associations, Girls' Institutes and Circles who take such an active interest in the welfare of Canadian public life. Particularly in the smaller towns, these communities is the influence of these willing workers felt. The social life of a village is built around the activities of the ladies organizations.

What would a town do without a delicious church supper every few weeks? Boards bending under the weight of plates of steaming potatoes, turnips, pickles, roast and pie to welcome all the townfolk and especially tempting to the menfolk, following a hard day's work.

Other nights there are croquet parties under the auspices of the W.A., or eucles and bridge parties, making the social life of the town worth while. Sometimes the W.A. sponsors a dance and that's the big event of the month. These communities is the influence of these willing workers felt. The social life of a village is built around the activities of the ladies organizations.

Vibration Of Double Stars

May Reach Out To Others Millions Of Miles Away

Stars which vibrate toward each other like the hearts of young lovers in June were described before the American Philosophical society in Philadelphia.

These pulsating stars are usually double stars which revolve around one another, Dr. Otto Struve, director of the Yerkes Observatory at the University of Chicago, declared, but the effect may reach out to other stars millions of miles away.

Have No Uniform Yet

Women's Land Army In Britain Is Getting Ready To Move

Military fashions for women in Great Britain are now being shown in the large department stores. The outfits are complete and there are a variety of accessories to choose from. This also holds good as far as women in the air raid precaution units are concerned but there is one group who have not yet been "officially clothed", these in the women's land army, the latest of the national service sections to be announced.

Recruiting for this particular form of wartime work is rapidly progressing. Thousands of women from all parts of the country are sending in inquiries and groups are in process of formation in hundreds of agricultural schools and colleges dotted throughout Great Britain.

Heavy Tax In Germany

Unmarried men and women in Germany were hit hard by a revision of the income tax law, enabling the government to take up 55 per cent. of their taxable incomes. It increased the tax on bachelors and unmarried women by 15 per cent. provided the increase does not raise their total tax payments above 55 per cent. of income.

Dr. W. H. Stenhouse, of the Connecticut Agricultural Experiment station, has developed an "all American" corn. Each ear is tri-colored in red, white and blue.

Animals of the cat family shake their claws for two reasons: It keeps the claws from being dulled and also allows the animal to walk noiselessly.

WHEN FRANCO'S TROOPS REACHED THE FRENCH FRONTIER

Troops of the Fifth Column of the Navarros, commanded by General Juan Sanchez Gonzalez, one of Franco's senior generals, arrive at the French frontier post of Perthus singing their national hymn with arms extended.

 next week for his home in Bonny-
 ville.

Queen Mary, who has been
 confined to her bed with a bad
 cold is reported much improved.

**Province of Alberta
Department of Agriculture****PROTECT YOUR HORSES**
FROM
EQUINE ENCEPHALOMYELITIS
(SLEEPING SICKNESS IN HORSES)

Experts agree that the outbreak of this disease
 is likely to reach its peak in Alberta this summer.

VACCINATION

is the only recommended preventive treatment.

PROCEDURE

1. Vaccinate all horses with "Chick" vaccine during the month of April.
2. Two doses of vaccine are required, given from seven to fourteen days apart.
3. Vaccine is available at drug stores, municipal offices and from qualified veterinarians. Cost for both doses—75c.
4. A qualified veterinarian, or if one is not available, some other authorized person should be obtained to administer the vaccine.
5. Farmers wishing to do so may vaccinate their own horses.

"Chick" vaccine properly administered will produce immunity for six months.

Warning!

Vaccine is effective only when given prior to outbreak of the disease.

UNITY OF CANADA

ALBERTA

...AND NOW OIL!

Canada's strength as a Dominion is built on the strength of her inter-dependent Provinces. Each of them shares in the production of the others; each contributes to the power of the Dominion as a whole.

With over 700,000 people, producing \$300,000,000 of wealth every year from agriculture, livestock, mining, trapping, fisheries, manufacturing, exporting some 7,000,000 tons of their products; with some 60,000 miles of roads, with 100,000 registrations of cars — passenger, truck and farm equipment; entertaining some 25,000 tourist cars, and thousands of visitors that come by rail, one would say Alberta is "top".

But in addition to all these riches—these grain fields, these immense flocks and herds, these mines and plants—new word has come of the Turner Valley Oil Fields, estimated to be the largest in the British Empire.

Potential production of the field is now 18,000,000 barrels per annum. Two new refineries will be built in Calgary at a cost of \$2,250,000, and a half million dollars will be spent in additions to an existing plant. The payroll of the Turner Valley Oil Field will approximate \$500,000 per month.

The significance to Canadians is that this gift of nature is located within the Confederation of Canadian Provinces—The Dominion—and therefore is one of the assets of the Empire. Alberta is great in her own right, but as one of a united series of Provinces stretching from the Atlantic to the Pacific she enjoys the prestige and standing of the Nation itself. Ask for Facts and Figures concerning the Automotive Industries and the work they are doing in Canada, and we will send them.

This advertisement is one of a series dealing with the Provinces of Canada, and will appear in many daily and weekly newspapers in the Dominion.

BUILDING CANADIAN MOTOR CARS
is a National Enterprise

The establishment of Canada's Automotive Industry has resulted in the creation of a home market of incalculable value to each and every one of the Provinces. The interchange of goods and money can be appreciated when one remembers that in the thirty alone spends in the Dominion every year on an average of \$100,000,000 which finds its way to every part of Canada. In turn, Canadians purchase Canadian-built cars, thus keeping money in Canada and helping employment. No dollar stays where it is made but is distributed gradually to the most remote parts of the Dominion. The Automotive Industry is National in purpose and National in scope. When you buy a Canadian-built car, you help your own Province.
